

Advanced Haematopathology 1st – 5th September 2008

This course is designed for haematologists and histopathologists with a special interest in haematopathology. The course focuses on the cellular and molecular pathology of the haemopoietic and lymphoid system with emphasis on microscopy and interpretation. The course includes microscopic evaluation of test cases and interpretation of immunohistochemistry by the participants, followed by discussion and review with the panel of experts.

Invited Speakers

J Apperley (London), B Bain (London), P Beer (Cambridge), I Clark (London), L Foroni (London), R Hasserjian (Boston), I Lampert (London), D Macdonald (London), K MacLennan (Leeds), S Marks (London), E Matutes (London), K Naresh (London), A Rahemtulla (London), A Reid (London), I Roberts (London), S Wagner (London), A Wotherspoon (London).

Programme Summary

Monday 1st	Morning	Haemopoiesis, acute leukaemia, myelodysplastic syndromes.
	Afternoon	Myelodysplastic syndromes
Tuesday 2nd	Morning	Chronic myeloid leukaemia, myeloproliferative disorders (histopathology).
	Afternoon	Myeloproliferative disorders (classification and biology), molecular diagnostics
Wednesday 3rd	Morning	Immunohistology, molecular cytogenetics, chronic lymphocytic leukaemia
	Afternoon	Lymphoproliferative disorders (blood and bone marrow), advances in myeloma biology, Guest Lecture
Thursday 4th	Morning	Gene expression profiling, nodal lymphomas, myeloma.
	Afternoon	Hodgkin lymphoma, myeloma biology, NK cell lymphomas and leukaemias
Friday 5th	Morning	Thymic pathology, MALT lymphomas, extranodal lymphoid proliferations.
	Afternoon	Thymic lesions, Quiz.

CPD accreditation is being applied for.

Course fee: - £750
Price includes catering and course book

Course organisers: Dr M Layton, Dr I Lampert, Professor K Naresh, Professor B Bain, Dr D Swirsky, Dr D Macdonald, Dr S Marks, Dr. I Clark
